ABHINAV DASARI

Mumbai, India | d.abhi2802@gmail.com | Linkedin| Github | Portfolio

SUMMARY

Data professional with hands-on experience in SQL, Python, and ML-driven analytics — from building data cleaning and ingestion pipelines to developing explainable ML models with 96%+ accuracy. Experienced in translating raw, messy datasets into dashboards and insights using Tableau, Power BI, and Python.

EDUCATION

Bachelor of Technology (B.Tech) – Information Technology **2023 – 2027 (Expected)**

K. J. Somaiya Institute of Technology, Mumbai | CGPA: 9.09 / 10

Relevant Coursework: Data Structures & Algorithms, Database Management Systems (DBMS), Statistics & Probability, Operating Systems, Computer Networks

SKILLS

- **Programming Languages:** Python, JavaScript, Java (Basics), C
- **SQL:** Joins, Subqueries, Window Functions, Aggregate Functions, CTEs
- **Data Analysis:** Pandas, NumPy, EDA, Data Cleaning, Statistics
- **Data Visualization:** Power BI, Tableau, Matplotlib, Seaborn, Plotly, Excel
- **Databases:** MySQL, MongoDB
- **Tools & Concepts:** REST APIs, KPIs, Dashboards, Git, Flask, FastAPI, HTML, CSS, React.js

EXPERIENCE

Data Analytics Job Simulation – Deloitte (via Forage) | [Link] **April 2026**

- Analyzed and cleaned raw business datasets to identify inconsistencies, remove errors, and prepare data for downstream analysis
- Built an Tableau dashboard to visualize key business metrics, enabling data-driven decision making

Technologies: Tableau, Data Analysis, Data Cleaning, Forensic Technology

Full Stack Developer Intern - TechAsia Mechatronics Pvt Ltd **June, 2025 – July 2025**

- Developed frontend components using React.js for a live product showcase website displaying the company's mechatronics product catalog to prospective clients
- Managed and queried SQL database to retrieve and organize product data for frontend display

Technologies: React.js, SQL, JavaScript, HTML, CSS

PROJECTS

NeuroAI — Explainable AI-Based ASD Classification & Severity Estimation | [Github] **2026**

- Built a multimodal clinical-support system integrating brain MRI, speech acoustics, and behavioral screening for ASD detection and severity estimation
- Achieved 96.55% test accuracy on binary ASD classification (Random Forest) and 84.21% accuracy (0.91 AUC) on MRI classification using a ResNet18 + EfficientNet-B0 ensemble
- Implemented explainability using SHAP (TreeExplainer) and Grad-CAM++, benchmarked across 17 models
- Developed a full-stack architecture using FastAPI and React with automated PDF report generation

Technologies: Python, PyTorch, Scikit-learn, FastAPI, React, SHAP, Librosa

Hotel Booking Analysis — Exploratory Data Analysis | [Github] **2026**

- Performed end-to-end EDA on a 119,390-row hotel booking dataset (2015–2017), removing ~27% duplicate records and correcting flawed date fields to ensure data integrity
- Quantified revenue impact: $22.97M actual revenue earned vs. $11.47M lost to cancellations, broken down by hotel type, deposit type, and season
- Built visualizations covering seasonality trends, cancellation patterns, and ADR analysis using Pandas, Seaborn.

Technologies: Python, Pandas, Seaborn, Matplotlib, EDA, Data Cleaning

ACHIEVEMENTS

- **Winner – Institute Level Round, Smart India Hackathon (SIH) |** [Link] **2025**

  Developed EcoSnap, a rewards-based mobile app that incentivizes eco-friendly actions (e.g. proper waste disposal) through image verification and a credit system.
