Mumbai, India | d.abhi2802@gmail.com | linkedin.com/in/abhinavdasari28 | github.com/280205-Abhi

EDUCATION

Bachelor of Technology (B.Tech) – Information Technology

2023 – 2027 (Expected)

K. J. Somaiya Institute of Technology, Mumbai | CGPA: 9.07 / 10 (up to Semester 6)

Relevant Coursework: Data Structures & Algorithms, Database Management Systems (DBMS), Statistics & Probability, Machine Learning, Operating Systems, Computer Networks

SKILLS

- **Programming Languages:** Python, JavaScript, C
- **SQL:** MySQL, Joins, Subqueries, Window Functions, Aggregate Functions, CTEs
- **Data Analysis:** Pandas, NumPy, EDA, Data Cleaning, Statistics
- **Data Visualization:** Power BI, Tableau, Matplotlib, Seaborn, Plotly, Excel
- **Databases:** MySQL, MongoDB
- **Tools & Concepts:** REST APIs, KPIs, Dashboards, Business Intelligence, ETL, Git, Flask, HTML, CSS

EXPERIENCE

Data Analytics Job Simulation – Deloitte (via Forage)

April 2026

- Analyzed and cleaned raw business datasets to identify inconsistencies, remove errors, and prepare data for downstream analysis
- Built an interactive Tableau dashboard to visualize key business metrics, enabling data-driven decision making
- Applied forensic data analysis techniques to investigate data patterns and surface meaningful insights

Technologies: Tableau, Data Analysis, Data Cleaning, Forensic Technology

Full Stack Developer Intern - TechAsia Mechatronics Pvt Ltd

June, 2025 – July 2025

- Developed frontend components using React.js for a live product showcase website displaying the company's mechatronics product catalog to prospective clients
- Organized and structured content data including product images, descriptions, and specifications for 50+ product listings
- Managed and queried SQL database to retrieve and organize product data for frontend display
- Collaborated in a hybrid team environment, coordinating with a senior developer to deliver assigned frontend modules on schedule

Technologies: React.js, SQL, JavaScript, HTML, CSS

PROJECTS

Hotel Booking Analysis — Exploratory Data Analysis

- Performed end-to-end EDA on a 119,390-row hotel booking dataset (2015–2017), removing ~27% duplicate records and correcting flawed date fields to ensure data integrity
- Quantified revenue impact: \$22.97M actual revenue earned vs. \$11.47M lost to cancellations, broken down by hotel type, deposit type, and season
- Built visualizations covering seasonality trends, cancellation patterns, and ADR analysis using Pandas, Seaborn, and Plotly
- Published on GitHub with structured notebooks, README, and reports folder

Technologies: Python, Pandas, Seaborn, Plotly, Matplotlib, EDA, Data Cleaning

ACHIEVEMENTS

- **Winner – Institute Level Round, Smart India Hackathon (SIH)**

2025

Developed EcoSnap, a rewards-based mobile app that incentivizes eco-friendly actions (e.g. proper waste disposal) through image verification and a credit system.
